

Maximize your settlement. Minimize your headaches.

You can be sure you'll obtain every advantage to which you're entitled under your insurance policy with the Southern Loss Consultants team on your side.

Here's how we do it.

Estimates

After a thorough on-site inspection, we use state-of-the-art construction estimating software and, if needed, work with structural building experts to prepare an estimate of what it will cost to restore your property.

Inventories

Through our systematic, on-site inspection and interview process, we'll work with you to account for all your damaged or destroyed property.

Business Income / Business Interruption

We help you arrive at a fair, accurate figure by familiarizing ourselves with your business. Together, we'll develop a strategy to ensure that you're fully compensated.

Loss Documentation

As part of the claims process, your insurance company requires you to "document your loss." We help you prepare this documentation, and the final package we submit to your insurance company on your behalf will be a professional recap of your entire loss.

Appraisals / Arbitrations / Mediations

In the event of a disagreement regarding the amount of your loss, an alternative resolution may be necessary. We have extensive experience in successfully representing property owners.
